

KAZAKHSTAN INDUSTRY WEEK

KAZAKHSTAN MACHINERY FAIR

01 - 03 April 2026

Date

01 - 03 April 2026

Venue

IEC Expo Astana
Mangilik El 53/1
Astana, Kasachstan

Organisers

Astana-Expo **KS Exhibition Company**
Leipziger Messe International (LMI)

The **Kazakhstan Machinery Fair** is the most important event in the field of mechanical engineering and metalworking in Kazakhstan and Central Asia. With an increase in space of 30% in 2025, 3,864 trade visitors and 294 exhibitors from 24 countries took part in the fair. Almost 40% of the exhibitors came from abroad. The annual conference of the Kazakh Engineering Association, which is attended by over 1,200 industry representatives as well as employees of authorities, institutions and organisations, is also held in parallel with the trade fair. The event brings together manufacturers and suppliers, as well as leading companies in the mechanical engineering and metalworking industries and representatives of the public sector. From 2024, Astana Expo organises this trade fair together with Leipziger Messe International (LMI) with the joint aim of further internationalising the trade fair.

Exhibits at the trade fair:

- Metalworking
- Forging & pressing equipment
- Welding equipment & materials
- Foundry equipment
- Measuring equipment & controls
- Cutting tools & tools
- Robotics, production automation and software
- Industrial 3D printing & additive technologies
- Lubricants and coolants
- Products from mechanical engineering companies
- Products for electrical engineering
- Industrial logistics & warehouse technology
- Occupational health & safety & PPE
- Professional training & skills

Price

- ➔ **Space only** (from 18 sqm): 320 EUR / sqm
- ➔ **Space with stand construction** (from 9 sqm): 360 EUR / sqm
- Incl. Country Branding (Snacks, Beverages):** 398 EUR / sqm

- +10 % surcharge corner booth
- +15 % surcharge peninsula booth
- +20 % surcharge island booth

+ Registration fee

360 EUR / Exhibitor

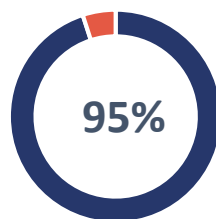

Kazakhstan is currently the largest economy in Central Asia and is driving forward the modernization of its economy. In 2023, the nominal gross domestic product amounted to around USD 255 billion, with real economic growth of 5.1 per cent compared to the previous year. With a share of over 32 per cent, industry makes a significant contribution to overall economic output, with the mechanical engineering industry accounting for more than 13 per cent within the manufacturing sector.

In the mechanical engineering sector alone, Kazakhstan imported machinery and equipment worth around 20 billion US dollars in 2023. This sector is therefore one of the most important growth drivers in Kazakhstan's industry and benefits from a sustained high demand for modern technology and innovative manufacturing solutions. There are currently around 5,400 companies operating in the mechanical engineering and metalworking sector, which together employ around 115,00 people.

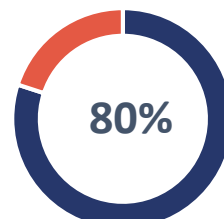

In addition, Kazakhstan is currently making great efforts to develop the engineering and manufacturing industry. To this end, the government has launched various programmes to promote this industry and has developed a comprehensive plan for the development of the engineering industry for the period 2024-2028. Thanks to continuous investment, the expansion of domestic production capacities and growing demand for high-quality machines and systems, the industry is continuing to develop dynamically and remains a central pillar of Kazakhstan's industrial value creation. This positive development offers German and international suppliers the best opportunities to operate successfully on the Kazakh market and to contribute to technological development together with local partners

Participating countries 2025:

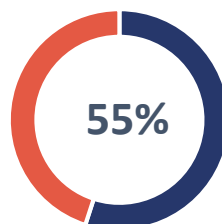

Austria, China, Czech Republic, France, Germany, India, Israel, Italy, Japan, Kazakhstan, Latvia, Poland, Russia, South Korea, Sweden, Switzerland, Turkey, Ukraine, United Arab Emirates, USA

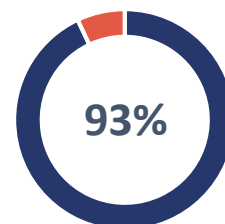

of exhibitors established new business relationships

rate the effectiveness of their investments as "high" or "very high"

will participate in the exhibition again

of buyers praised the range and quality of the exhibitors
